

Cybersecurity Training Diary

Day 22: Capstone Project & Career Preparation

1. Capstone Project Challenge

✓ Choose Your Mission

```
graph TD
    A[Project] --> B[Red Team]
    A --> C[Blue Team]
    A --> D[Governance]
    B --> B1(Penetrate a test network)
    C --> C1(Build SOC monitoring)
    D --> D1(Create ISO27001 policy)
```

✓ Project Options

Track	Task	Tools/Standards
Offensive	Exploit Metasploitable VM	Kali, Metasploit, Burp Suite
Defensive	Detect attacks with ELK Stack	Wazuh, Sigma rules, Zeek
Compliance	Conduct NIST CSF assessment	OpenSCAP, CIS Benchmarks

2. Career Toolkit

✓ Resume Building

```
**Skills Section Example:**
- ✓ Penetration Testing (OSCP methodology)
- ✓ SIEM Management (Splunk, Sentinel)
- ✓ Cloud Security (AWS/Azure hardening)
- ✓ Compliance Frameworks (NIST, ISO27001)
```

✓ Interview Prep

Common Questions:

1. "Walk through your approach to a web app pentest"
2. "How would you respond to a ransomware incident?"
3. "Explain TLS handshake to a non-technical executive"

✓ Certification Roadmap

```
pie
    title Entry-Level Certs
    "CompTIA Security+" : 35
    "CEH" : 25
    "ISC2 CC" : 20
    "Azure Fundamentals" : 20
```

3. Practical Exercises

♦ Exercise 1: Build Your Lab

```
# Set up a free cloud lab
git clone https://github.com/clong/DetectionLab # AWS detection lab
terraform apply
```

♦ Exercise 2: Mock Interview

Record yourself answering:

"Describe a recent cybersecurity news story and its implications"

4. Reflection Questions

- ? What specialization excites you most?
- ? How will you continue growing post-training?
